COMPANY PROFILE

Who We Are

As a highly specialized manufacturer&exporter of building materials, ALUNO has been engaged in the aluminum products industry since 2006, offering clients globally Carport & Awning, Decoration panel, motorised pergola louvered roofs, aluminium louvre window frame, aluminium shutter&louvres, aluminium windows and doors, window&door accessories. ALUNO continues to invest heavily in customer care and product development in order to equip our customers with the advice and market leading products they need to succeed in today's market.

Our Mission

We seek to establish working relationships with our customers through commitment, communication and teamwork.

Our Vision

We strive to become our customers "preferred choice". This vision is underpinned by the company's core values, values which have developed over the years and which are fundamental to the way in which ALUNO operates.

Our Core Values

- Client Focused – Our company possesses a customer-first mentality. It's not just something we say because it's trendy or sounds good. It really is something we believe – from the top management team down to our front line.
- Customer Experience – Our top priority is providing superior service. We strive to meet our clients' needs on projects of all sizes, by providing our services, our solutions, our knowledge of the products and our long-term commitment to customer satisfaction.
- Competitive Pricing – We are committed to offering clients the best prices without sacrificing service or quality. Our industry experience, product knowledge, superior service and creative support staff guarantee our clients receive the best solutions at the best price.

Balcony Canopy

Window Canopy

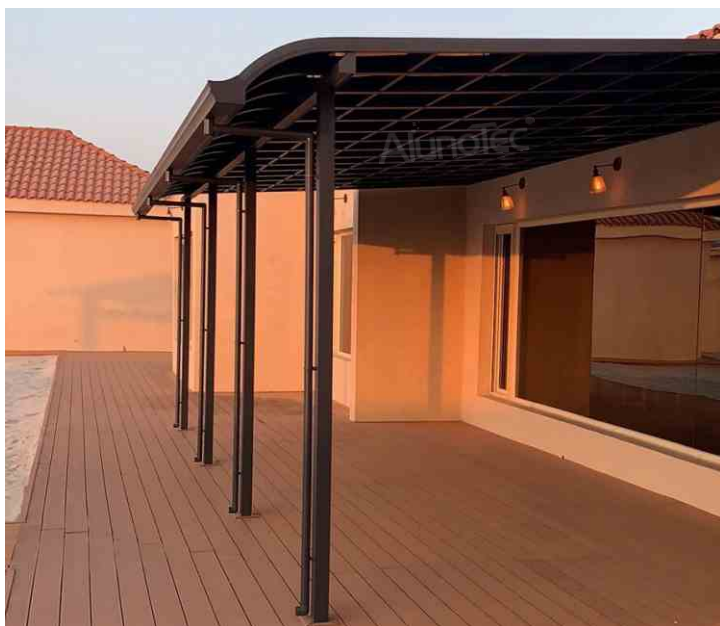

Main Products

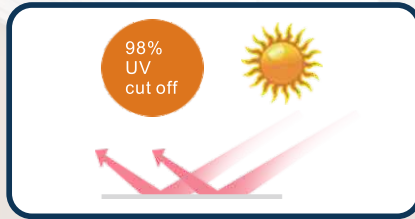

Balcony Curved Canopy

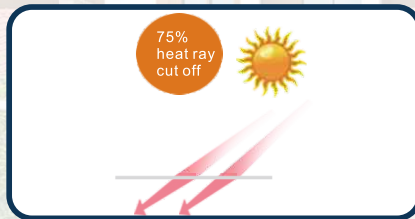

Window Curved Canopy

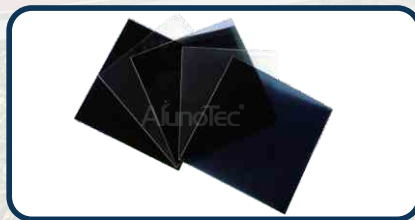

Features Of Materials

Cut off 98% UV, and protect people or vehicle from harmful UV rays.

It cuts off heat ray transmission by 75% and lower the interior temperature when a car is parked under the polycarbonate roof.

Polycarbonate roof

Polycarbonate roof are made of Germany Bayer Material which can use more than 10 years.

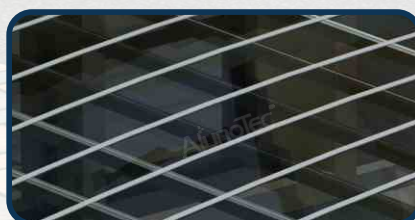

Aluminum

Use high quality and environmental-friendly Alunminum which fulfills with the international.

Snow load and wind load

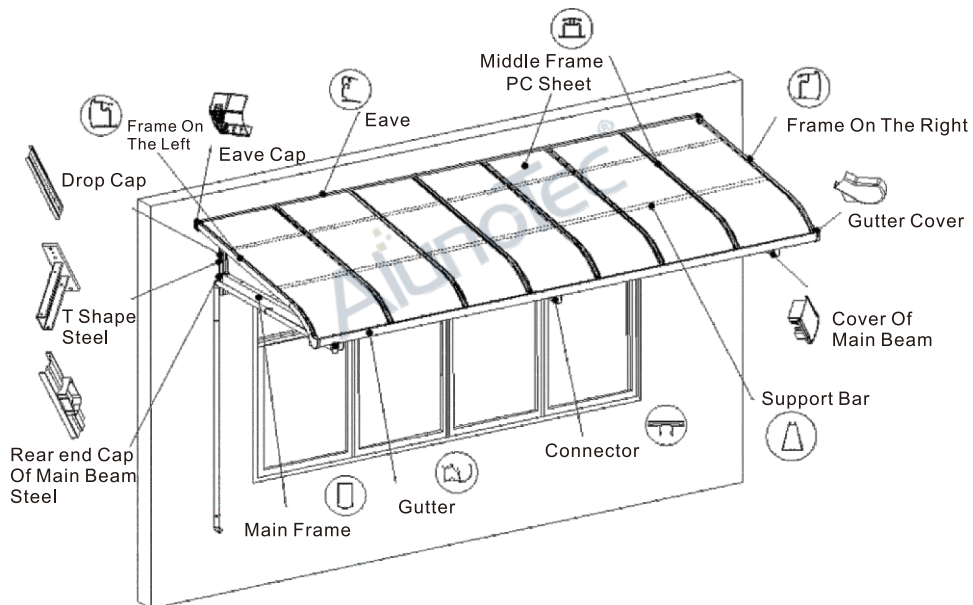

Aluminum alloy structure and the combination of polycarbonate plate can load 20--50 cm snow. Resistance to 36m / s strong wind, significantly improve its wind resistance.

UV Resistance

There is Co-extrusion UV on the surface which can effectively block more than 98% UV rays.

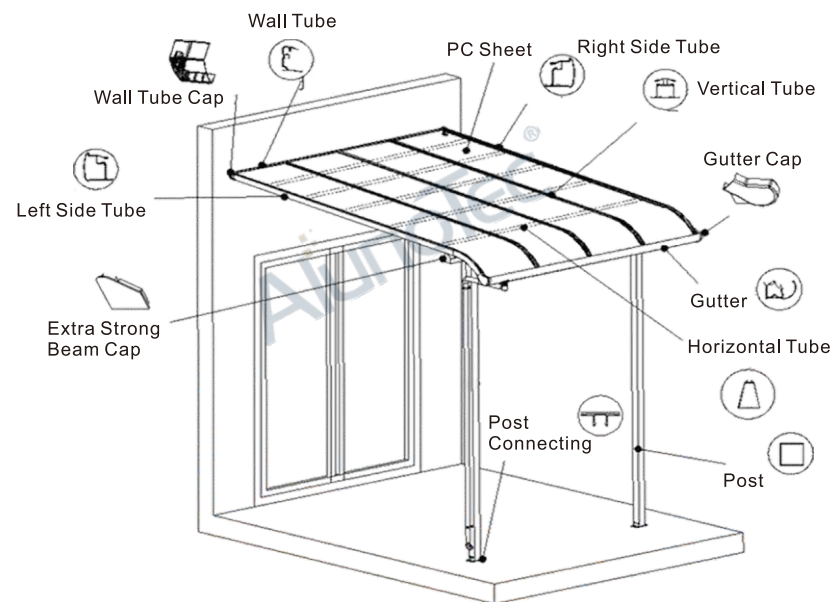

Window Curved Canopy

ALN-WC

| Standard Size | Customized |
|-------------------------|------------------------------------|
| Roof Material | Germany Bayer Polycarbonated Sheet |
| Color Options for Frame | White, Purple, Grey, Champagne |
| Color Options for Roof | Light/Dark Grey, Blue, Clear |
| Snow load | 20-50cm |
| Wind load | 36m/s |
| Installation Way | Wall Mounted |

AlunoTec Project Case

Canopy cover can provide all year round protection from the elements so that you and your family can enjoy the relaxation year after year.

Dubai

New Zealand

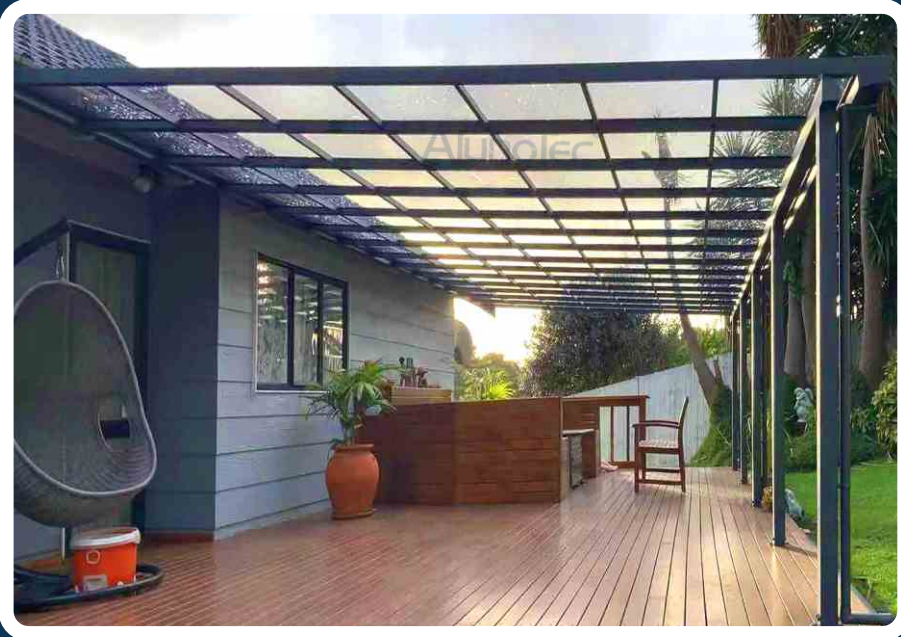

United States

The outdoor living space covered with the canopy awning, it can resist the sun and rain so that they can enjoy the extra living space perfectly!

AlunoTec balcony straight canopy is made of aluminum profile and Germany bayer polycarbonate sheet, which makes it more strong to resist wind and rain. And it would be more durable and low maintenance. Irregular shape design is available to cover the whole area you wish to cover so that it can become an extra living and relaxing space.

Aluminum canopy has added another room to my home. I employed Kitset assembly services to assemble the canopy and they took half day to finish all. I prepared outdoor furniture to match the canopy as well, it looks great. I am looking forward to open party with my families and friends to get some relaxed time.
